WANT TO PLAY?

Stephanie Kwolek, Age 3

Explore the playful side of invention and the inventive side of play in *Invention at Play*.

Learn how play—the ordinary and everyday “work of childhood”—connects to the creative impulse of both historic and contemporary inventors.

invention playhouse ▶

When asked what inspired them to become inventors, many adults tell stories about playing as children. In our virtual playhouse, you can set your own inventive thinking in motion.

inventors' stories ▶

The abilities humans develop through play—curiosity, persistence, imagination, communication, problem solving—have been and continue to be an important part of the inventor’s tool kit. Explore the stories of inventors, both famous and little-known, whose creative habits of mind began in childhood play and resulted in a variety of useful contributions.
